#### #1 Target setting – OGCI Upstream Methane Intensity Target

# OGCI Upstream Methane Intensity Target & Aiming for Zero by 2030

- OGCI set a collective upstream methane intensity target of 0.20% in 2017.
- OGCI member companies met their target in 2021 four years early.
- They did it by focusing on addressing leaks, flaring and venting.
- OGCI's 0.2% target for methane intensity is now frequently used as an industry standard.
- OGCI now aims for "well below 0.20%" by 2025 and near zero by 2030.

## #2 A new ambition on methane: Aiming for Zero

The Aiming for Zero initiative aims to **eliminate** the oil and gas industry's methane footprint by 2030.

"treats methane emissions as seriously as the oil and gas industry already treats safety. We aim for zero and we strive to do what is needed to get there"

Size of the prize: 2 Gt CO2e per year

O&G industry answer to the **Global Methane Pledge** 

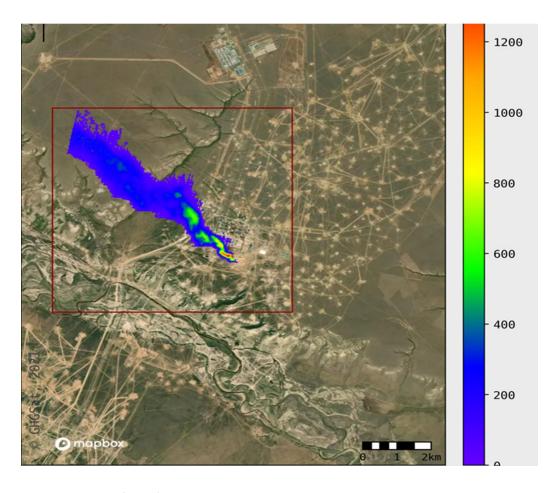

100+ Signatories & Supporters and counting

**COP28 Presidency** leveraged most of the language for future 2023 Dubai Announcement.

# #3 Mitigating methane emissions and supporting broader industry

#### Using GHGSat technology to mitigate methane emissions in developing countries

#### Three core objectives:

Take practical, tangible action to reduce CH4 emissions.

Demonstrate how satellite-based detection technologies can be used and integrated as part of a broader LDAR campaign.

Share resources and knowledge on methane emission reduction with the rest of the oil and gas industry

**Sources:** GHGSat (2021)

#### **OGCI Satellite Monitoring Campaign**

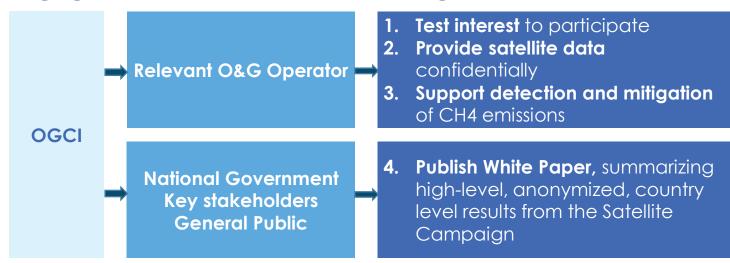

#### **Key Components**

- Targeted (GHGSat)
- O&G only
- Impact-focused
- Peer to peer & long term
- Confidential
- Playbook of options
- OGCI funded

#### Campaign run over:

- Iraq
- Algeria
- Kazakhstan
- Egypt

#### **Engagement & Satellite Data Sharing Processes**

#### High level results from 1 country Campaign

Number of plumes detected per month per monitored asset (with number of successful observations per month in brackets)

	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22
Site 1	0 (1)	4 (3)	2 (1)	1 (1)	0 (1)	2 (2)	1 (1)	0 (1)	0 (7)	0 (2)
Site 2	0 (1)	0 (1)	0 (2)	0 (1)	0 (1)	0 (1)	0 (2)	0 (5)	0 (10)	0 (2)
Site 3	0 (0)	0 (0)	0 (1)	0 (2)	0 (3)	0 (1)	0 (1)	0 (4)	0 (8)	0 (5)

## OGCI Satellite Monitoring Campaign – High Level Results from Iraq

engagement with the local operator

#### **Engagement with local** operator still ongoing today:

- Satellite Data Sharing
- Investigation of plumes and sources of methane emissions **>** elimination of continuous CH4 plume ranging 0.5 to 8 tCH4 / hour.
- 30+ hours of training on (1) detection, (2) quantification, (3) reporting frameworks, (4) mitigation of plumes
  - Introduced to external stakeholders (consultants, OGCI member companies, tech service providers, etc.)
